

## Outputs

**Virtual archive developed as universally accessible, functional, online digital platform - [www.earchive-estlatrus.eu](http://www.earchive-estlatrus.eu)** (with possibilities for cross-collection search and indexed with metadata descriptions, and with interface translated into English, Estonian, Latvian and Russian languages)

**4 digitalised collections developed** – student files, church books, historical maps and various personal documents (from archives of Estonia, Latvia and Russia (St.Petersburg))

**11546 files (text materials, photographs and maps) digitalized and 481622 documents made available** for beneficiaries and target groups in Estonia, Latvia and Russia

**1 content and 1 metadata database** with standardized descriptions for the digital platform developed

**94 archive specialists and 39 people with disabilities trained** on usage of e-archive portal in 4 online sessions

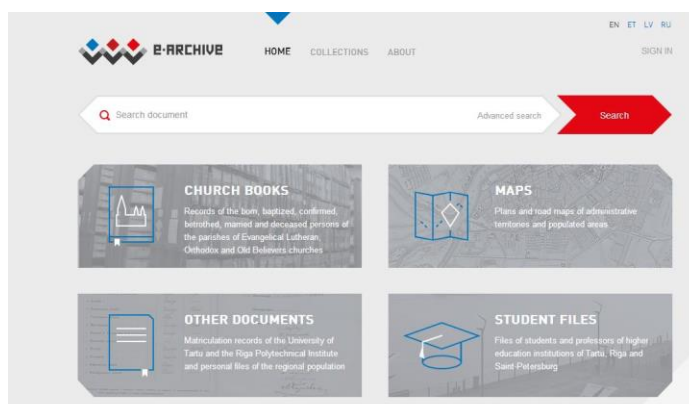

**1 professional article and 5 professional publications developed and published** (Digitalisation handbook for e-archives; Deployment of the e-archive system in Russia; Archives and digitalisation in Russia; E-archive handbook; Methodological material for usage of e-archive platform.)

**Video Clip capitalising project results produced** in 4 languages

**Website of the project** – <http://project.earchive-estlatrus.eu> developed and is functional

**6 international events organized**

**7 Newsletters issued, over 85 online articles published, 6 TV/Radio broadcasts performed** and 11 promotional materials produced

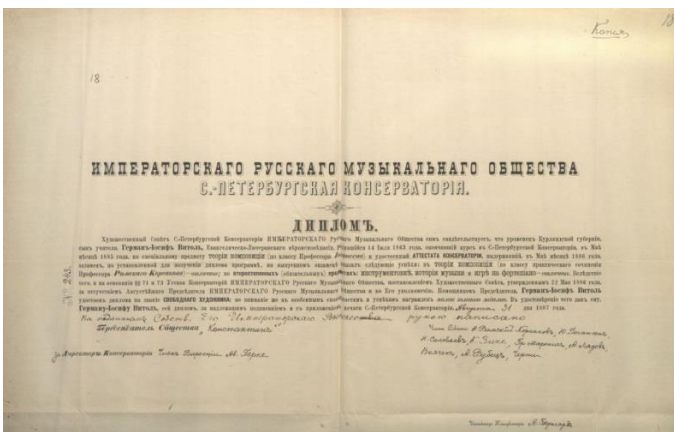

**Closing conference of the project held in Riga and Jūrmala on 19-20 June 2014**

**Information Day of the project on 30 January 2013, Riga, Latvia**

**ARCHIVAL DOCUMENTS:**

**RESULTS**

**Semi-professional social cooperation network is established and unites historians, archivists, librarians, educators and other people interested in cross border cultural, historical, educational, personal or any other professional contacts**

**People from border areas of Estonia, Latvia and Russia have unique digital access to the valuable and otherwise restricted collections and information related to the common history, culture and population of the citizens in their native languages and in English**

**Future generations will gain from the content of portal, its valuable genealogical information and will use it for creating new links**

**Further development and expansion of the platform is ensured and additional newly developed services and themes can be included**

**Target audiences in Estonia, Latvia and Russia and outside Programme territory widely informed about genealogical search opportunities**
