

# **Exploring the history of narrow gauge railway**

## **EHNGR**

**Priority 1** Socio-economic development

**Measure 1.3** Tourism development

#### Short summary of the project

The project connects Estonian and Russian origin organizations and interest groups that are involved with the narrow gauge railway history.

The project idea is to promote narrow gauge railway thematic tourism field which covers developing joint tourism goods and services, commonly accepted strategy of tourism and creation of co-operation networks in the field. In the light of tourism the history of railway transportation has not been presented in a very attractive manner. Nevertheless the history holds out a lot of interest making it possible to take a look back to the shaping of cultural history, development of society and many events with historical importance.

For this purpose the preparations such as necessary work projects, plans and studies will be made to create a museum and exposition in Türi and St. Petersburg.

## Overall objective

- Raising the competitiveness of the areas of partner institutions
- **♣ G**eneral development of cross-border co-operation and sharing the resources between partners
- **↓** Find solutions to mutual problems
- ♣ To promote cross-border tourism

## Specific objective

- **◆** To establish all the preparation works for building a narrow gauge railway museum in Türi and to create an exposition (also museum in future) of narrow gauge railway in St. Petersburg that would advance the development of the area and deal with the historical research of railway history;
- **■** Estonian and Russian tourism goods and services are with good-quality, versatile and full filling the mutual objectives of the partners. Tourist information about the tourism goods and services are up to date and easily accessible to everyone;
- ♣ Regularly conducted surveys and data analysis on the theme of Estonian-Russian tourism to describe the economy of tourism, evaluate it and fix the shortcomings.
