RESULTS

Increase of the usage of modern ICT by governments of cooperating regions to serve business, educational institutions, public organizations and citizens locally and in cross-border areas

The **most modern ICT approaches demonstrated** at Demo Centres' presentations and trainings to governmental, public, business sectors to improve their capacities

Project partners **strengthened** their **IT platforms for wider promotion of e-services** developed and presented in the DC's: <http://spbdemo.ru/> (St. Petersburg DC), <https://e-estonia.com/meet-the-industry/livinglab> (Tallinn DC), <http://www.teaduspark.ee/en/TSP> (Tartu DC), <http://www.rigaitdemocentre.com/en/it-portfolio> (Riga DC)

Governmental bodies have clear **understanding of the demand for their services in cross-border areas**

The tool for utilizing modern ICT solutions is obtained by governmental bodies and governmental **electronic services** are **developed and piloted**

Network partners established **good connections with other Demo Centres and ICT clusters** in different countries inside and outside EU. Project partners got hold the latest concepts in the sector and transferred them into national background, like **DEMOLA in Latvia** and **Living Lab in Estonia**

Joint feasibility study for the established Demo Centres' network developed

Demo Centre in Riga (Latvia)
