## outputs and results

## Outputs

Two most frequently requested **services in municipal archives** - queries about the working records and burials provided by cross-border archives **in Narva (Estonia), Kingisepp and Slantsy (Russia)**

All **15 archivists** in 2 involved archives in Kingisepp and Slantsy (Russia) supplied with **personalized ID-cards and special soft environment** as a pilot in cooperation with Estonian Certification Center

**Specific equipment sets** to digitize archive material and exchange relevant documents digitally provided in 3 involved archives

**600 handbooks**, **8 000 copies** of step-by step Guidelines both for archivists and population of border areas, and **Flash animation** of Guidelines produced
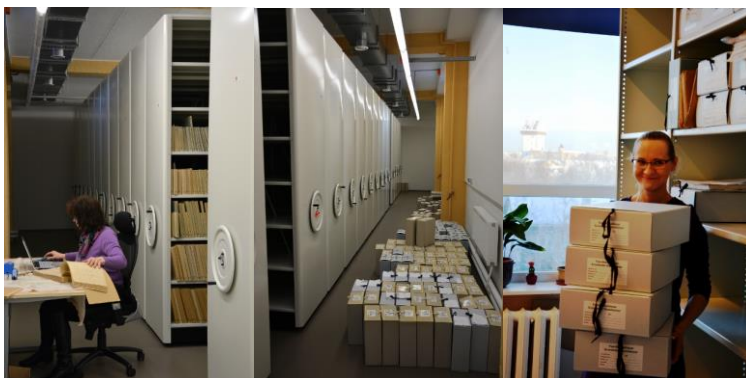

**2 Conferences, 2 seminars and joint training** for target municipalities organised

**10 000 leaflets**, 3 newsletters, 7 press-releases and 9 factsheets, 6 articles, 1 promotional stand, **2 internet videos and 1 TV broadcast**, 7 webpages developed

**Project webpages** created and information published on
http://www.ega.ee/project/elrii-470

*Project presentation by Ms. Annela Kiirats, July 2013*

*Project activities in Narva archive (Estonia), 2013-2014*

*Project meeting in Narva archive (Estonia), June 2014*

*Project meeting in St.Petersburg, June 2014*

*Final Conference in St.Petersburg, November 2014*

*Presentation of ID-cards at Final Conference in St.Petersburg*

## RESULTS

Mutual **agreements in common procedures** between involved cross-border archives in Narva (Estonia), Kingisepp and Slantsy (Russia) established

**Involved archives equipped** with relevant equipment and guiding documents **to start using e-services**

Personalized ID-cards, special soft environment and valid certificates give the document real **signature with a timestamp**,

Forms to fill in available on archives' web-pages for public **to make archive query online** - a person can sign the query digitally and send it to archive for processing

Three involved municipalities interested in **implementing the new services** into everyday routine and the **need for additional e-services** increased

Strong partnership created during the project provides **good basis for sustainable development** towards better E-government

**More than 300 000 people** from the programme area and beyond informed on the project results and solutions
