

Cooperation in the theatre and the music arts development

Culture arts

Priority 3 Promotion from people to people cooperation

Measure 3.2 Cooperation in sphere of culture, sport, education, social and health

Short summary of the project

There is decrease of inhabitants in the project region because many young people choose to leave their native towns and go to bigger cities where they could find better life conditions - possibilities to study, work and spend their free time qualitative. So it is necessary to search for the possibilities how to keep those persons in the region.

Without putting in order infrastructure the population should have the possibilities to spend their free time in an active and useful way, have good possibilities to relax. One of the possibilities is to be involved in different activities, increase person's skills and let them spend their free time interesting and qualitative.

Some traditional amateur groups successfully work in the inhabited places of the project territory. Unfortunately many young people do not take part in these activities. The residents are looking for something new and diversity. As a result of such situation many things of traditional national heritage are lost.

To settle this above mentioned problem the most effective settlement could be to organize cross border cooperation with the aim to use neighbours' experience. There are specific features characteristic to the culture at every municipality of the project partners, for example, for Russians more characteristic is the development of more active way of playing different music or drama, but for Latvians it is more reserved. In Russia jazz and Dixieland is developed but in Latvia good accordionists are. These special features should be more interesting for other partners of the project and such cooperation possibilities will contribute to the inhabitants desire to try something new and take part in these ones.

Overall objective

Promotion of attractiveness of Latvia and Russia for inhabitants and businesses.
